Overview

The **Omni8C** and **Omni16C** Backlit LED Remote Displays provide 8/16 points of display in a stand-alone panel-mount package without electronics. These displays provide panel indication where no integral alarm handling logic is required. Ideal for use with the Omni16C RLU (Model 1479B) or directly

connect to your PLC. Common positive or Common negative switching options are available. Integral lamp test feature enhances system reliability. These displays provide an ideal low cost alternative to individual panel indicators.

The Omni8C/16C Remote Displays have been assessed as suitable for use in SIL1 applications as specified in IEC61508.
