

Features

- Small , compact, panel mounted and easy to use
- 8 Potential Free Contact Inputs
- Normally Open/Closed Selectable via DIP switch
- 24Vdc Powered
- 27 Standard Sequences
- Choice of Lamp/Sidebar LED/Backlit LED Display
- User printed legends on inkjet/laser printer
- Four function Group Alarm output contact
- Motor Alarm Sequence and Timer options
- Optional internal repeat relay outputs
- Fully "DIP" Switch Configurable
- Optional Serial Port - Modbus/PLC compatible

The Omni-8c annunciator is the compact replacement to the Omni-8a and b series annunciators with one product offering the option of incandescent lamps, backlit LED or Sidebar LED indicator windows. Omniflex has completely re-designed the Omni8C with new technology to compliment PLC's in applications where alarm annunciation is required using serial communications. Omni8C is a panel mounted annunciator occupying half the space of the previous model. Install the optional integral Test, Silence, Acknowledge, Reset Pushbuttons sacrificing one alarm window or use an externally wired pushbutton station.

The 8 inputs accept potential free inputs and are

individually DIP switch configured for N.O. or N.C. operation. Inputs are wired to plug-in terminals at the rear of the annunciator. The alarm sequence for the 16 inputs is also configured by DIP switch with a choice of 27 standard sequences. Four output relays can be configured as group alarm, horn output and watchdog with a change over contact at the terminals. The group alarm can be set to one of four functions, Follows input, follows alarm, Multiple reflash, Ringback horn.

Input 8 may be designated via DIP switch as an Inhibit input which disables all the inputs on the annunciator during maintenance activities.
